

# Save the Earth Voice™

2008 NEWSLETTER FOR THE SAVE THE EARTH

## Save The Earth Foundation

has raised the public awareness of important environmental issues through its mass media programs for over 20 years.

The 501(c)(3) non-profit organization fundraises tirelessly to support vital research at U.S. colleges and universities, including UCLA's Department of Environmental Health Sciences (EHS).

2008 has been a very productive year for Save the Earth Foundation. We continue to raise funds to support a variety of organizations studying global climate changes and working to institute "green" programs to effect global change.

Our heartfelt thanks and appreciation go out to all of our supporters as we continue our mission to raise awareness of our most precious resource, the Earth.

For more information about the good works of Save the Earth Foundation, please visit our website at: [www.SaveTheEarth.org](http://www.SaveTheEarth.org) or email us at: [ste4@savetheearth.org](mailto:ste4@savetheearth.org)

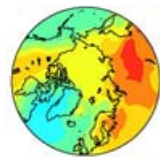

The Davidson Seamount is a spectacular geologic feature on which recent explorations have documented dramatic biological discoveries. This project of the Monterey Bay Sanctuary Foundation will use funds from Save the Earth Foundation to characterize the ecology and habitat of the Davidson Seamount in hopes of including it as part of the National Marine Sanctuary.

### CHANGING CLIMATE

### CHANGING LIVES

On October 17, 2007 the Save the Earth Foundation participated as a Sponsor in UCLA's Summit on the Public Health Effects of Climate Change which focused on the public health concerns involved with global warming.

Professor Alan Gillespie of the Global Warming Project at the University of Washington's Department of Earth and Space Sciences, will use Save the Earth Foundation funds to study recent climate changes on glaciers in the Gobi Desert of Central Asia.

GreenAsset Disposal, an environmentally friendly disposal and remarketer of used information technology, has partnered with Save the Earth Foundation to focus on the impact of eWaste on our environment.

## StarRide

Star Ride Kids Inc., part of the eco-friendly movement, has joined forces with Save the Earth Enterprises, Inc. to unveil a new line of licensed onesies, tees, and sportswear for infants and children made from organically grown and produced natural and/or recycled fibers. A portion of all sales will be donated to Save the Earth Foundation.

Sakar International, Inc. a 30-year old consumer electronics

manufacturer, has partnered with Save the Earth Foundation to endorse their new *Eco-Trends™* line which produces computer, iPod/MP<sub>3</sub> and digital camera accessories. All accessories manufactured under this line will be made of recyclable plastics and printed with eco-friendly inks and dyes. Packaging will also feature information about the work of Save the Earth Foundation.

SAVE THE EARTH

Produced online by Ken Margolis since April 22, 1995
